About Me

With a solid background spanning over 3+ years, I am a creative and passionate frontend developer dedicated to crafting dynamic websites and web applications. Proficient in developing and designing the frontend of cutting-edge mobile and web applications, my focus is on creating user interfaces that are not only visually appealing but also intuitively easy for users to read and understand. My goal is to elevate user experiences through thoughtful design and seamless interaction.

Work Experience

Frontend Developer

<https://live.af/> Herat, Afghanistan | On site

08/05/2024 – 20/06/2024

- Enhanced the overall design and functionality of the live.af website, focusing on user-friendly and visually appealing design.
- Implemented a dynamic ad system that displays a new ad every time a user switches channels.
- Designed an intuitive and user-friendly interface for both administrators and IT technicians, elevating the overall user experience and adoption.
- Improved site performance to handle dynamic content, ensuring smooth and responsive operation.
- Created a robust system to handle dynamic ad display, improving user engagement with relevant ads.

Key Achievements: Significantly enhanced the live.af website's functionality and user experience by integrating a dynamic ad display system and optimizing performance, resulting in increased ad visibility and engagement.

Frontend Developer

<https://rehso.org/> Herat, Afghanistan | On site

03/10/2023 – 16/01/2024

- Developed a new, intuitive dashboard to enhance user interaction and streamline backend management.
- Modernized the REHSO website with a fresh design, optimized layout, and improved navigation.
- Applied contemporary design principles to create a visually appealing and user-friendly website.
- Developed a new dashboard with improved functionality and user experience.

Key Achievements: Successfully overhauled the REHSO website and developed a new dashboard, significantly improving user engagement.

Frontend Developer

<https://rahanet.af/> Herat, Afghanistan | On site

03/10/2023 – 16/01/2024

- Redesigned and modernized the Rahanet ISP Services dashboard to enhance usability and functionality.
- Contributed to ongoing website maintenance to ensure optimal performance and user satisfaction.
- Implemented essential features and improvements based on the latest UX/UI trends.
- Improved website performance with faster loading times and a responsive design.
- Provided ongoing support and maintenance to address bugs, optimize performance, and ensure smooth operation.
- Applied contemporary design principles to create a more engaging and user-friendly dashboard.
- Utilized performance monitoring tools to track and improve website speed and responsiveness.

Key Achievements: Successfully refactored the Rahanet dashboard, resulting in improved usability, enhanced user experience, and ongoing optimal website performance.

Frontend Developer

<https://mitservice.vercel.app/> *Toronto, Canada | Remote*

10/05/2023 – 17/08/2023

- Crafted a task management application that facilitates clear communication and accountability by enabling administrators to assign tasks to IT technicians.
- Implemented a reporting feature for tracking task progress, completion status, and troubleshooting issues encountered during the process.
- Designed an intuitive and user-friendly interface for both administrators and IT technicians, elevating the overall user experience and adoption.
- Engineered real-time updates on task status, allowing for efficient monitoring and informed decision-making.
- Developed RESTful APIs to enhance system functionality and improve data accessibility.
- Created a responsive and mobile-friendly interface, ensuring an optimal user experience across various devices.

Key Achievements: Developed a comprehensive task management system for MIT Service, optimizing task assignment, progress tracking, and real-time updates. This contribution significantly improved communication, accountability, and operational decision-making.

Frontend Developer

Container Management System *Islam Qala Custom Herat, Afghanistan*

06/10/2022 – 18/01/2023

- Led the design and implementation of a user-friendly, responsive interface, ensuring optimal user experiences on various devices.
- Collaborated closely with the development team to create and refine the frontend architecture for an efficient and seamless single-page application.
- Actively participated in the continuous improvement of integration processes by deploying and integrating frontend software, enhancing system efficiency.
- Generated detailed documentation, including functional and technical documents, to facilitate smooth project development and knowledge transfer within the team.
- Played a pivotal role in the development of RESTful APIs, contributing to enhanced system functionality and improved data accessibility.
- Established and maintained effective communication channels with cross-functional teams to ensure

alignment and successful integration with existing business systems.

Key Achievement: developed a user-centric container management system, contributing to streamlined operations and significantly improving customer experiences within the customs department.
